

Agua Special Utility District PWS ID # 1080022
Boil Water Notice for Community Public Water Systems
June 26, 2023

Due to reduced distribution system pressure, the Texas Commission on Environmental Quality has required the Agua SUD public water system to notify customers of the affected area (see map) to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc.). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions.

To ensure the destruction of all possible harmful bacteria and other microbes, water for drinking, cooking, and ice-making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, public water system officials will notify customers that it is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescind the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact Agua SUD at 956-585-2459 or Agua SUD at 3120 N. Abram Rd. Palmview, Tx. 78572.
